Chair of the Standing Committee on Foreign Affairs  
2-2-1-304 Nagatacho, Chiyoda-ku, Tokyo 100-8981, JAPAN  
FAX: 81 +3-3508-3302

**Mr. Yoshihiko Noda, Prime Minister of Japan**

**Ms. Makiko Tanaka, Chair of the Standing Committee on Foreign Affairs**

**We demand cancellation of the Japanese Diet schedule for the Atomic Energy Agreement approval, and immediate retraction of the Agreement between Jordan, Viet Nam, Republic of Korea, and Russia**

It is NOT understandable that Japan and the world continue and/or expand nuclear power business across countries while Tokyo Electric Power Company (TEPCO)'s Fukushima nuclear power plants continue to be at crucial stage and without any solution for de-contamination of all living environment including human body. It is NOT acceptable to put people's life of all nations at risk of radiation and to make our mother earth contaminated by radioactive substances and wastes.

Japan is the country who experienced both Atomic Bombs and nuclear power plant accident. Upon these devastating experiences, Japan should take initiative to stop the trend of global nuclear business and should put effort to create sustainable world where people can live healthy.

As countries with skills and technologies, Japan and other nuclear exporting countries rather should contribute themselves to small scale renewable energy development which does not harm nature, local cultures, and people's peaceful living.

We demand Japan to cancel the schedule for the Diet approval of the Atomic Energy Agreement, and demand Japan and partnered countries, Jordan, Viet Nam, Russia, and Republic of Korea, to retract the Atomic Energy Agreement and to stop participating to the global nuclear business in order to protect your own people as well as people beyond national borders.
